LIFTING ERGONOMICS TO NEW HEIGHTS

Premium Lift Systems

A DOVER™ COMPANY

Innovative. Economical.
Efficient.

The Swing-A-Way Lifter from Bayne Premium Lift Systems was specifically designed to save time, reduce costs, and protect workers from back and other injuries associated with heavy lifting

To minimize weight and bag breakage, many companies are switching to smaller cans or heavier mil bags to manage their trash needs. Smaller cans mean employees must take out the trash more frequently, preventing them from serving customers and performing other value-added duties. Heavier mil trash bags are more costly than lighter mil bags, causing users to literally throw money away.

The unique design of the Swing-A-Way Lifter makes it an ideal solution for any commercial or industrial application that uses a 6-yd front-loading container. The Swing-A-Way Lifter can lift up to 500 lbs., requires little space to operate, and can fit most locations with ease.

Technical Specifications:

- *Lifts up to 500 lbs.*
- *15-second cycle time*
- *Electrical: 110-volt single phase or 230/460-volt 3-phase*
- *Available solar option provides an environmentally friendly solution for outdoor applications*
- *Uses food grade hydraulic oil*

Benefits:

- *Reduce employee injuries related to heavy lifting*
- *Fewer employees needed to take out the trash*
- *Minimize worker's compensation costs*
- *Use lighter mil, lower cost trash bags*
- *Easily lift bags and cans too heavy to lift manually*
- *Can be used indoors or outdoors*

Applications:

- *Restaurants and Cafeterias*
- *Apartment & Condominium Complexes*
- *Grocery Stores*
- *Schools and Universities*
- *Theme Parks*
- *Municipalities*
- *Retirement Communities*

Industries:

- *Auto Parts*
- *Food Service*
- *Medical*
- *Pharmaceutical*
- *Produce*
- *Recycling*
- *Shredding*
